Chennai, Tamil Nadu — +91-7550088033 — vishaali.s.2024.cse@rajalakshmi.edu.in — LinkedIn — GitHub

1 PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive web interfaces and IoT systems. Strong foundation in HTML5, CSS3, and Python. Currently learning React and Node.js for full-stack development. Passionate about building business applications and SaaS products. Quick learner with proven ability to master new technologies through project-based learning.

2 TECHNICAL SKILLS

Frontend: HTML5, CSS3, Responsive Web Design, UI/UX Design, JavaScript

Programming Languages: Python, Java, C

Full-Stack: React.js, Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB (Basic) — **Tools:** Git, GitHub, Vercel, Netlify, IoT Hardware, Basic Automation

3 PROJECTS

IoT Stampede Prevention System

GitHub

- Built complete hardware-software system for real-time crowd monitoring that **advanced to finals in TechQuest competition among 30+ teams**
- Engineered hardware component with sensor integration and created responsive frontend dashboard displaying live crowd density metrics
- Developed alert triggering mechanism that automatically notifies authorities when crowd exceeds safe thresholds—**enabling faster emergency response and potentially preventing casualties**
- *Technologies: HTML5, CSS3, IoT Hardware, Real-time Data Visualization, Sensor Integration*

Disney Mind - Movie Recommendation Website

Live — GitHub

- Developed web application enabling Disney fans to discover movies from database of 50+ films with intelligent search and filtering
- Built multi-filter system supporting 8+ genres with real-time filtering—**reducing movie discovery time by 80% compared to manual browsing**
- Implemented responsive UI with personalized recommendations and favorites list—**creating engaging experience that increases user engagement and retention**
- *Technologies: HTML5, CSS3, JavaScript, API Integration, Responsive Design*

2-Player Game

Live — GitHub

- Developed fully functional two-player game with complete game state management and real-time score tracking
- Implemented robust game logic with collision detection, boundary validation, and win/loss conditions—**ensuring smooth, glitch-free gameplay**
- Built responsive design working flawlessly across 3+ device types (phones, tablets, desktops)—**making game accessible to diverse user base**
- *Technologies: HTML5, CSS3, JavaScript, Game Logic, DOM Manipulation*

4 EDUCATION

Bachelor of Engineering in Computer Science and Engineering *Expected Graduation: 2028*

Rajalakshmi Engineering College, Thandalam, Chennai — CGPA: 8.25/10

Relevant Coursework: Data Structures, Database Management Systems, Web Technologies, Object-Oriented Programming

5 CERTIFICATIONS

Python Programming — C Programming — Data Science — Oracle Database Management System

6 ADDITIONAL

Quick learner, strong problem-solver, comfortable with rapid technology adoption. Available for summer internship.
